GF121
**MC401**

EX5104-D-52D1/333-4/MC401/GF121

1-needle, cylinder bed, overedger for attaching elastic

MC401: Elastic feeder/insertor with tape cutter

GF121: Automatic elastic/tape feeder (vertical feeding)

Subclass specifications

● Application

For attaching continuous elastic to tubular goods, such as swimsuits, leotards, panties and similar garments

● Features

Conventionally, this operation requires a high level of techniques. However, the elastic feeder/insertor with tape cutter (MC) deskills the operation because it feeds the proper amount of elastic according to the machine speed and the automatic tape cutter cuts the elastic based on preset data. Thanks to this device, attaching elastic accurately and uniformly to tubular goods is easy.

Since a drop feed mechanism is employed, the bottom feed dogs drop below the top surface of the needle plate when the presser foot is raised. Use of this mechanism enables smooth fabric loading.

Sewing data is stored, so all you have to do is call up the data you need if the size of the fabric is changed. High quality is achieved on finished products without any difficult adjustments. In addition, operational efficiency is increased.

Equipped with a small cylinder bed, the machine can sew small tubular goods.
